

# Packaging with a conscience.

PaperFoam® is an eco-friendly alternative to the standard plastic jewel case or digitray. Choose PaperFoam® to fulfill your biodegradable CD and DVD packaging needs.

Composed 100% of recycled and recyclable materials, PaperFoam® is an environmentally friendly packaging material derived from renewable resources (starch, cellulose and water).

## Benefits:

The tray is 100% biodegradable and can be recycled as paper or composted to biodegrade.

Lightweight compared to the standard plastic alternatives, studies have shown the PaperFoam® tray only has a fraction of the CO<sup>2</sup> emissions and energy use.

PaperFoam® gives you great flexibility and freedom - you choose your colour, paper stock and creative inspiration.

The PaperFoam® tray is acknowledged as the first successful environmentally-friendly alternative to plastic - perfect for your tailor-made packaging needs.

## Just the facts:

### Combines:

Functional packaging  
Environmental sustainability
